Product detail with video

## Big Store

Vending machine of last generation that allows the sale, in complete safety, of products with a high value thanks to a robotic system and a touchscreen, enabling the visualization of all data objects offered for sale, with added images, descriptions and video.

Allows web chat to provide assistance to the customer in case of special applications to give further assistance in real time.

Is suitable to sell any product, in particular high-tech products such as smartphones, tablets, cartridges printers, watches, computer accessories, cameras, video games and clothing.

It is also used for advertising to launch new types of business (see airports, railway stations, shopping centers etc..) Allowing the sponsorship of combined sales of the product.

## Big Store features:

- Modular storage with configurable transport system in three dimensions without using any power tool.
- Lighting of products by a high efficiency LED system.
- Automatic withdrawal system with mobile belt, optical system and radio frequency detection.
- Product identification system with radio frequency reading for the absolute control of products for sale even in case of loading mistakes.
- Internal storage for the collection of products for those not withdrawn or returned, such as empty cartridges or books.
- Fidelity card to identify the user with personalized awards and bonus.
- Credit card reader with prepaid system, banknote / coin reader and change giver.
- Web chat with camera, microphone and speakers to interact directly with the manager / owner of the distributor.
- ATM Withdrawal / Restitution with double safety system.
- Industrial computer with hard disk.
- Touch screen with the latest infrared technology.
- Electronic opening of the loading door, to know when and for how long did the loading operation.
- Remote system for the management of the dispenser, sales check, warehouse stock, temperatures and logistics.
- Spotlights placed above the distributor.
