Magex produces with quality system certified by

TÜV AUSTRIA ZERTIFIZIERT

The Easy is a vending machine that is convenient for your customers and for you. Does not require the client to bend down to pick it up the items, but delivers it at head height. In addition, the device offers a service that is unlimited, 24 hours, 7 days a week providing a quality service, equal to that in a store.

It can accommodate up to 1152 products distributed in a total of 8 floors.

In addition to providing a better mode of delivery, it also provides a of superior quality process for delivery, that's careful not to manipulate or flip the selected item. It can deliver even the most fragile and delicate item.

It is a machine equipped with the best technologies, such as LCD touch-screen dispenser transportation, loading, front / rear, electronic pricing display, innovative payment systems and intelligent elevator, to establish itself as the number one in its category.
Easy

MADE IN ITALY

Loading System Magex®

Maximum adaptability to distribute any type of product, you can pair more than one lane in an automatic way to distribute products that are wider. The system also allows the insertion of interlocking partitions to separate products that are next to one another from the next.

The system has a self-diagnosis system that checks the operating status of the lane before any disbursement of the product.

Patented	VI2006A000275, VI2009A000079
	VI2010A000343, VI2011A000026

Patent Pending	WO2010/116395A1
	US 2012/0104018A1
	10717310.6

Easy delivery system

The Easy distributor differs from any other vending machine thanks to the product being delivered in a transparent compartment, placed at the center of the window. This solution facilitates the withdrawal of products delivered through an automatic opening of the partition. Its location to ninety centimeters from the ground, designed for people with disabilities or mobility difficulties.

Suitable in particular for the sale of delicate products or the need for them to be delivered in a horizontal position.

Service data in real time

Magex is able to provide all its customers a service for the management of vending machines in real time connected via Web technology, accessible from any system connected to the network. This allows you to view real-time data of each sale, the status of the stock, the coins / banknotes inserted or rendered, automatic rebooting in case unplanned changes in the operation system, for example intrusion attempts. It also monitors the temperature and the evaporation inside the distributor with relative visualization of the details.

The technical data and information provided are approximate and subject to change without notice.
