

Advantages

Versatility: magazine configurable as required, option of re-allocating products at any time, to suit seasons, trends and tastes of customers

Manageability: GSM interface for management of SMS text messages, broadband connectivity for statistical analysis of sales trends

Convenient loading and configuration: the products are inserted via the front glass door, removing the compartment drawers, and spaces can be reconfigured in height, width and depth by moving the panels and clip-on partitions

Hygiene: constant operating temperature even in adverse weather conditions, via active control, with complete separation between the product compartment and collection compartment

Fragile product handling: tray type collection elevator, handling by transfer, use of soft materials

Protection and safety: structure in steel, double armoured lock, security glazing, vandal-proof keypad, display protection, automatic block of collection compartment, latest generation banknote reader, alarm

Operating economy: low consumption LED lighting, high density insulation materials, minimal heat dispersion during delivery of products thanks to separation of product compartment and collection compartment, low maintenance

Ergonomic and user-friendly: intuitive controls, large character display, controls and products easily accessible by the disabled or elderly, collection flap requiring use of just one hand

Integrated payment systems: banknote reader, coin reader, pre-paid card reader, hopper type change-giver

Child safety: age recognition system by N.I. number card or tax code card reader

Recall visibility: large glass front with LED lighting, backlit display, products always kept in order and aligned, personalisable graphics

Simplified billing: daily revenue entered in cash register

Multiple vending points in the area:

Shop24 the vending machine can be installed anywhere, also outdoors, on public property, at service stations, kiosks, camp sites, seaside resorts, airports etc

Reliability: the selection of the best materials MADE IN ITALY, exclusive software, assembly at our facilities of Montebello Vicentino by highly qualified personnel and direct after-sales service make this one of the most reliable professional tools in the vending sector.

Operating scheme

1
Product selection

2
Payment with banknotes or...

...coins or ...

...fidelity card

3
Product selection via wide LCD display

4
Product dispensing

5
Product transfer by means of robot controlled elevator

Thermal separator opening phase

6
Arrival in collection compartment

7
Product delivery by means of swing panel opening system

8
Change collection
Optimal change autonomy thanks to hopper system

What does it stock?

Shop24[®] the machine is able to stock a vast range of products with any type of packaging; in boxes, bottles, cans, jars, bubble wrapped, in envelopes, bags, fragile, precious, thin, heavy, asymmetrical, with an offset centre of gravity, perishable, frozen etc.

How it works

Shop24[®] is an automatic multi-product vending machine, created from the long-standing experience of Magex S.r.l., a company with TÜV certification.

Shop24[®] offers unrivalled versatility in the sector, by virtue of the patented delivery system with motor-driven product channels.
